Summary

Full Stack Developer experienced in building web applications with React.js, Next.js, Node.js, and MongoDB. Skilled in REST API development, database management, frontend architecture, and AI-powered integrations. Focus on robust, efficient, and user-centric end-to-end solutions.

Skills

Languages: C++, Typescript, JavaScript, HTML

Frontend: React.js, Next.js, Tailwind CSS, shadcn/ui

Backend: Node.js, Express.js, REST APIs, JWT, Clerk auth

Database: MongoDB, Convex

Tools: Docker, Git, GitHub, Copilot, Postman, Vercel, Render

Experience

Full Stack Development Intern

July 2025 – August 2025

THDC INDIA LIMITED (On-site)

- Contributed to full-stack feature development using React.js, Node.js, and REST APIs on a branch-based Git workflow.
- Built and documented 5+ RESTful API endpoints for user data management and internal application workflows.
- Optimized MongoDB queries for frequently accessed data, improving retrieval efficiency and application performance.

Projects

Second Brain | *Next.js, Convex, Clerk, Shadcn* | [GitHub](#)

- Built a Second Brain application to centralize personal notes and documentation in a clean, unified dashboard.
- Implemented **document and note management**, enabling users to upload MDX/text files and create individual notes.
- Integrated **AI-powered summarization and AI chat**, generating concise document summaries and answering user queries from uploaded content.
- Added Convex vector semantic search and Clerk-based organization support to enable intelligent search across notes.

Captionly | *Next.js, React, Tailwind CSS, FFmpeg/WASM* | [GitHub](#)

- Built a **full-stack caption generation platform** where users upload videos, generate transcriptions, and embed styled captions into the output file.
- Used **FFmpeg compiled to WebAssembly** to handle all video processing client-side, eliminating server costs and reducing rendering latency.
- Created a **captions editor** to review transcriptions, adjust frame-level timing, and customize caption styles (font, size, colours, position).

TypingBud | *React.js, Express.js, REST API, JWT* | [GitHub](#)

- Built a **typing speed web app** in React.js with three modes **Time**, **Word Count**, and **Quote** for varied practice workflows.
- Designed a **typing engine** to track keystrokes, errors, WPM, and accuracy with per-keystroke feedback.
- Developed a **modular frontend architecture** with reusable components Typing Box, StatsBar, Graph, and Timer.
- Implemented **JWT-based authentication** with protected routes and user sessions via REST APIs.

Education

GB Pant Institute of Engineering and Technology

Pauri Garhwal

Bachelor of Technology in CSE (AI/ML) — CGPA: 8.17

2022 - 2026

St. Peters School (CBSE)

Udham Singh Nagar

Class XII – 95.4% | Class X – 91.8%

2019 & 2021

Achievements

- Ranked among the top 5 students in my academic batch
- Solved 300+ DSA problems on LeetCode and GeeksforGeeks.
